

# Bathroom Fixtures & Fittings

For clients choosing to include a bathroom within their garden building, we offer a complete, thoughtfully designed specification to ensure it feels just as refined and comfortable as the main house. Our bathroom pods typically include a modern electric power shower, vanity unit with basin, contemporary toilet, heated towel rail, extraction fan, and matching laminate flooring to flow seamlessly from the rest of the space.

Bathrooms are tailored to suit the building's layout and use – whether it's for guest accommodation, a home gym, therapy room, or creative studio.

Where a bathroom is included, you will need to notify your local planning authority. If you're unsure of the process, we can support you with the correct steps to ensure compliance from the beginning.
