

A modern bathroom interior with a glass shower enclosure, a white pedestal sink, a toilet, and a chrome towel rack. The text "BATHROOM POD SYSTEM" is overlaid in white, bold, sans-serif font.

# BATHROOM POD SYSTEM

# INTRODUCTION

---

A complete, beautifully engineered solution — designed to fit perfectly.

Our bathroom pod system is crafted to slot seamlessly into an internal footprint of 1.2m x 2.4m, providing a fully functional, purpose-built bathroom without compromising on internal space or design.

Each pod is pre-designed for efficiency, comfort and long-term reliability, and installed using our discreet macerator and ventilation systems for smooth operation and easy ongoing maintenance.

# OUR STANDARD BATHROOM POD

---

A carefully curated specification, chosen for performance, longevity and a clean contemporary look.

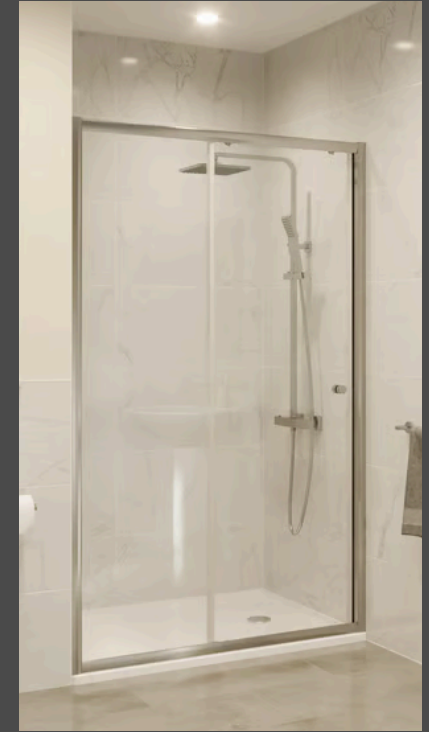

Your standard pod includes:

- A full-height shower enclosure with quality mixer or thermostatic shower
- Wash basin with minimalist fittings
- WC system with our integrated macerator technology
- Electric towel rail
- Extraction fan for moisture management
- All internal plumbing, electrics and ventilation prepared for connection

This setup gives clients a refined, modern bathroom that feels spacious, practical, and cohesive with the overall building design.

# CUSTOMISATION & UPGRADES

---

Because every building we create is bespoke, your bathroom can be tailored exactly to your taste.

Options include:

- Alternative layouts to suit different internal arrangements
- Bath options (built-in or freestanding)
- Premium sanitaryware (basins, taps, shower kits, WC designs)
- Fitted cabinetry & storage solutions
- Enhanced fixtures in finishes such as matt black, brushed brass or chrome
- Feature lighting, niches and integrated shelving
- Choice of wall finishes, from wet-wall to premium tile options

Our standard pods are smart, modern and well specified — and we can elevate them further with a more luxurious finish if desired.

# WHY OUR POD SYSTEM WORKS SO WELL

---

Our bathroom pods are designed specifically for garden buildings, giving you a compact yet fully functional space that integrates smoothly into the overall design. Every detail has been considered — from moisture-managed ventilation to efficient internal layouts — ensuring a clean installation and long-term reliability. Because each building we create is bespoke, we can tailor the styling, fixtures and layout to suit your preferences while maintaining exceptional durability and ease of access for maintenance.

If you'd like to explore layout ideas, materials or upgrade options, our team is always here to guide you through every stage.
